

Dr. Jose Buratini, Eugin Group, IT

DVM degree at Sao Paulo State University and PhD on Animal Reproduction at the University of Sao Paulo in collaboration with the University of Montreal. Associate Professor and coordinator of the "Molecular Ovarian Physiology Laboratory" at the Department of Structural and Functional Biology, Institute of Biosciences, Sao Paulo State University, since 2001. Initially engaged in basic studies on the regulation of folliculogenesis and luteal function using the bovine model. Since 2012, the control of cumulus cell metabolism and oocyte developmental competence has become his main research focus. Scientific Coordinator of the Eugin Fertility Centres in Italy since November of 2018, where he has worked on studies covering different aspects of human ART including oocyte and sperm competence, controlled ovarian stimulation and embryo morphokinetics. President of the Brazilian Society for Embryo Technology (SBTE) during 2016-2017.
